# THE NEW ICON IS BORN

A step forward towards the future, the step that marked the encounter between the passion grown in the fiart shipyard for over sixty years, and the genoese eclectic naval architect, Stefano Pastrovich, who has signed this iconic 54 footer.

The perfect mix of **functionality and style**: innovative, muscular lines and at the same time light and slender.

*Fiart*

You are at the center of the scene. From bow to stern in safety, through an **easy central passage**.

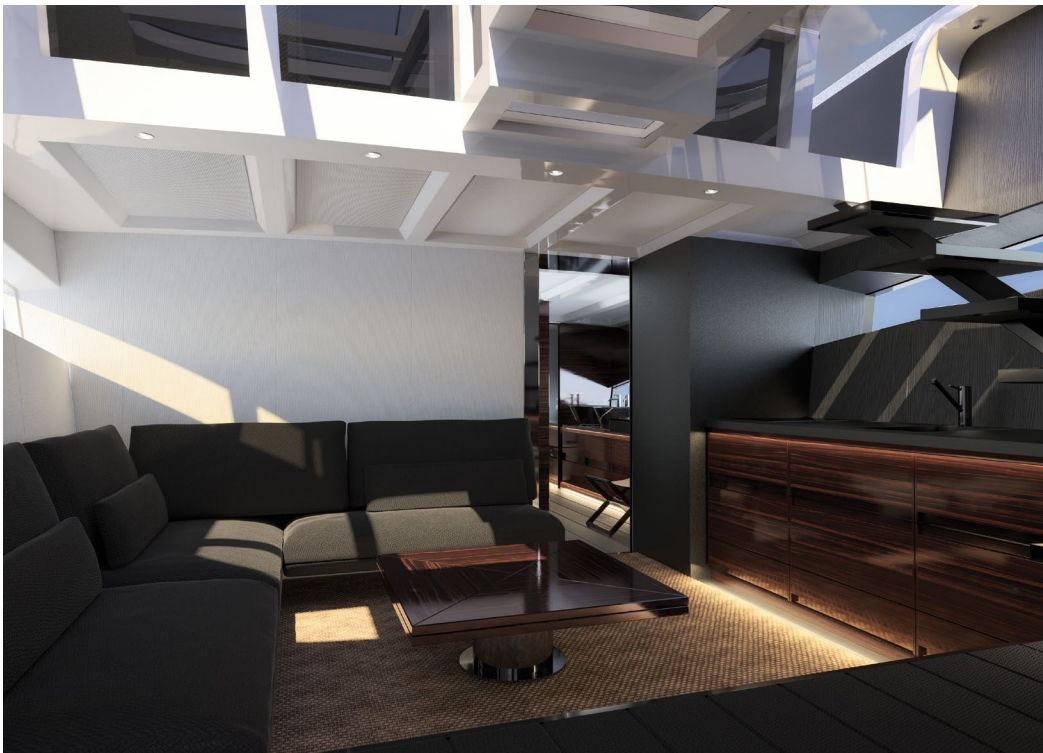

Relax in the large bow “pool” surrounded by comfy cushions with backrests: **an environment tailored to your privacy**.

**Open and close the windshield  
as you desire,** making the covered  
area cooler on the hottest days,  
comfortable and sheltered in case  
of colder or rainy weather.

Interior spaces and furnishings conceived as a sophisticated loft, luxurious and refined.  
**You will feel at home.**

An elegant steel and oak staircase connect the outdoor spaces to a **large living area amidships with a kitchen**, a large L-shaped sofa with a coffee table that converts into an 8-seater table.

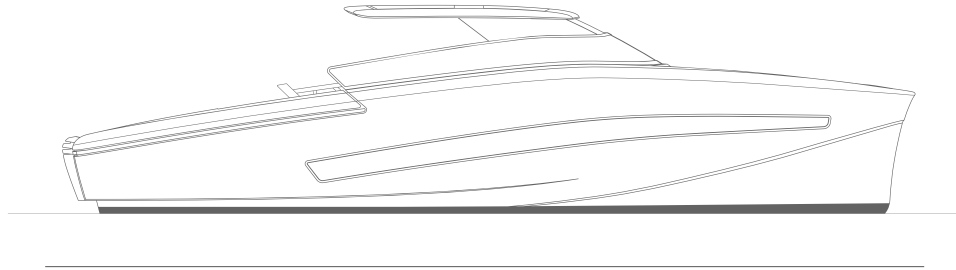

**Refined fabrics and noble veneers**, such as dark oak and ebony, enhanced by the **breath of the heights and the natural light**, that filters through the large windows that cross the entire hull, create continuity between the internal and external environments.

# DATA SHEET

**LOA / Overall length**  
16,65 m

**BOA / Maximum beam**  
5,1 m

**Category**  
B

**Range**  
300 miles

**Number of person**  
14

**Number of cabins**  
2/3

**Displacement**  
20-25 t

**Fresh water capacity**  
1000 l

**Fuel capacity**  
2900 l

**Speed**  
34-39 knots

**Black and gray water capacity**  
200 l

## EXTERIOR

The boat is equipped with a standard roll bar and a hard top that can be added at your request.

You can decide whether to have an open boat, using the awnings to make the most of the shade, or install the hard top, creating a central covered and sheltered space, a cool area to live in and furnish with a dining table and large sofas.

The stern hatch allows access to a tender compartment located under the deck. The submersible platform facilitates the tender launching.

## INTERIOR

The P54 blends with your wishes through two modular internal layouts that will meet every requirement:

- two large master cabins with 2 open space bathrooms with shower box and separate toilet
- living room with kitchen amidships
- day head

or

- aft master cabin with open space bathroom with shower and separate toilet
- two cabins in the bow, one for guests and one with two single beds, divided by a sliding wardrobe system that can be transformed, if necessary, into a single large, delightful, and welcoming suite
- bathroom with shower and separate toilet
- living room with kitchen amidships
- day head with shower

In all layouts, the aft cabin with double bed is convertible into two single beds. Both solutions include a cabin for the sailor.

# STANDARD EQUIPMENT
