05	ABOUT AZIMUT	P47

A one-of-a-kind beauty, enrapturing, that steals your breath away, leaving you speechless. An extraordinary idea as the only possible pathway, to get to where you want, to explore, to go beyond.

The freedom of embracing the unknown, that you know you'll love as a part of your very own story. A thought that provokes your mind and then inspires you to aim for the impossible, making mistakes, yet being brave.

A magic je ne sais quoi that enchants and intrigues you, moving you to feel more and to sense uniqueness.

The choice to risk it all, the one that makes you go for it, to impress yourself and all those who are worth it.

Welcome to Azimut.

AZIMUT.  
DARE TO AMAZE.

01

# THE DESIGN & LIFESTYLE ON BOARD

# FLY 72 PURE DESIGN WITH AN EDGE

An equilibrium of power and presence, the Fly 72 combines a considerable stature with avant-garde ingenuity, artfully masquerading volume through a taut design and grand glass surfaces.

The captivating streamlined exteriors give way to lofty interior ambiances that express stately modern Italianness. Size, sportiness and comfort all race to smoothly combine, delivering an ocean-bound adventure conceived for the most demanding inclinations.

Savor sports-inspired style aboard the Fly 72.

Welcome aboard, ladies and gentlemen.

Let us begin the tour.

# SHE EXPRESSES PERFECT BALANCE

The Fly 72 sports sleek and slender lines, underscoring clean surfaces with a dynamic stance. Designer Stefano Righini sought to balance oversized outdoor living on a sporty platform and an air of elegance. Even at rest, she gives the impression of an exhilarating ride.

# SURPRISING BREAK AT THE BOW

The bow offers a lounge and large sunbeds on a panoramic platform over the waves. Deep cushions invite you to soak up the sun's warmth after a plunge in the sea or to relax in the shade of the bimini. The superstructure's sporty lines tend towards the stern, working with the squared-off bow to expand the sky above.

The highest deck hosts three distinct and harmonious spots across the flush expanse. The dedicated dining area amidships is served by a bar cabinet under the shelter of the hard top.

# YOUR PERFECT SPOT, ON TOP OF THE WORLD

[ The aft is open ended, with space for more sofas or sunbeds. ]

[ Forward, next to the wheelhouse, the second dinette is easily transformed into a sunbed, keeping contact between pilot and guests. ]

# A SEA-IMMERSIVE EXPERIENCE

Open sky and infinite horizons open the floodgates of positive emotion, sweeping away the little worries of life with a grand gesture of untouched beauty.

A natural extension of the salon, the cockpit is the ideal place to socialize and enjoy unique moments in the company of your guests, a place with no separation between sky and sea.

# DOWN TO THE WATER'S EDGE

The stern reaches down the waves with a hydraulic bathing platform, ready to deploy watertoys or swimmers mere meters from the cockpit.

Underlying the elegant and captivating interior design project is an exploration of the latest trends in contemporary furniture. Unexpected shapes and matched materials create a playground for a unique interpretation of light design.

[ The overhead LEDs cast clean, glowing light, synergizing with any natural illumination and adding a futuristic element to the design. ]

# SEASIDE SIGHTLINES

[ Center stage, the formal dining seats eight guests in the most transparent part of the main deck. ]

# BOUTIQUE ATTENTION TO DETAIL

The thoughtful composition of the interior décor achieves a sophisticated, modern aesthetic. Large windows light up the contrasting colors and glow off the natural materials.

# BREAKING DOWN VISUAL BARRIERS

[ The full-height window over the waves are respected by low-profile bulwark to keep even closer contact with the sea.]

[ The forward array of galley, dinette and helm, set around the formal dining, put the crew in a perfect position to efficiently carry out their duties uninterrupted. A side door behind the helm lets the crew get around without passing through the guest areas in use. ]

Now, let us discover the guest accommodations.

Shall we?

The owner's full-beam suite amidships has a separate dressing room and elegant vanity.

# THE UPPER TOUCH OF THE INTERIORS

The Fly 72's sophisticated design language is further elaborated below deck, into the accommodations. The theme evolves, using the material palette in different places and proportions to evoke feelings of relaxation, peace and wellbeing.

[ The master suite is full beam with large windows and full height reflective surfaces for a vast sense of space. ]

# ASPIRE TO WATER-LEVEL

Aesthetic framing gives distinction to the comfortable vanity, which provides for relaxation and intimate moments with the sea as close as possible.

Beyond their tasteful design details, the three additional guest cabins all offer full-height walking space and en-suite bathrooms.

[ The sporty, custom-made helm seats are as robust as they are comfortable. A copilot is thoughtfully positioned on the outside to come and go freely during extended navigation. ]

02

# HER MAIN TECHNICAL FEATURES

The beauty of the Fly 72 is not solely a matter of exterior and interior design elements that combine to perfectly play out Azimut's essence. Her beauty is also about discovering the technological advancements and special components that contribute to making her truly unique and highly innovative.

# CARBON-TECH GENERATION

Azimut's pioneering use of carbon fiber lamination goes beyond pure performance. The Carbon Tech Generation offers expanded volumes on board, while maintaining excellent dynamic stability and perfect handling. Preserving the yacht's low center of gravity, the carbon fiber was focused on the upper parts of the yacht, lightening the laminated components by up to 30% and reducing the natural roll momentum up to 15%.

① HARD TOP (OPT)

② ROLLBAR

③ FLYBRIDGE

④ SUPERSTRUCTURE

# ACTIVE TRIM CONTROL

Automatic interceptors by Humphree gives the vessel the lift it needs to get up on plane faster or to reach that optimum running trim. In this way the resistance of the hull is automatically optimised for every speed and load condition, this resulting in increased speed and lower fuel consumption. The Humphree system is all electric powered by 12-24 Volt DC. Thanks to the design of the Interceptor it only requires a small amount of power to move the blade up and down, even under high speed operation.

# INTEGRATED CONTROL AND MONITORING SYSTEM

The custom-installed Raymarine electronics have been integrated to control and monitor every onboard system: from engines and alarms, to bilge and water discharge pumps, tank levels and engine room ventilation, right through to the sound system and the air conditioning units. The system can be accessed onboard from both the interior and exterior helm stations and, with the mobile app, remotely from a tablet or smartphone.

# EFFICIENT AIR TREATMENT

Aircare Energy Saving completely refreshes the onboard atmosphere every two hours with filtered outside air, especially appreciated below deck. The decentralized system uses a dual-flow heat exchanger, so it can optimize both the temperature and the humidity of the incoming fresh air in each zone without increasing the parallel HVAC's energy consumption. Meanwhile, the triple multilayered filter eliminates 98% of fine particles that pollute the air, such as pollen, dust mites, spores and even some bacteria.

# HTS HIGH TECHNICAL STANDARD DECLARATION

This yacht's design and engineering meet the highest standards for production recreational vessels. Azimut Yachts issues a declaration of the premium materials, advanced technology and rigorous testing procedures.

#### UNI ISO 8666

The performance described applies to a vessel with standard configuration (standard equipment installed) and a clean hull, propellers, and rudder. It is also noted that the performance described was recorded under favourable sea and wind conditions (Beaufort scale index 1, Douglas scale index 1); different and worse sea conditions could significantly impact performance.

#### CE MARK

Given the continual evolution of technology, Azimut | Benetti S.p.A reserves the right to modify the technical specifications on its vessels at any time and without prior notice.

# ABOUT AZIMUT

# A FAMILY-MADE COMPANY CULTURE

An immense and personal passion for the sea. A clear and forward-facing attitude. A strong and relentless work ethic. Since 1969, Paolo Vitelli, the creative visionary founder and businessman behind Azimut, has been set on challenging the industry's status quo with a daring desire: bring to life an unexpected nautical experience, through yachts built to combine alluring aesthetics with construction expertise and impeccable technology.

An audacious mindset that has, over time, surprised and captivated the yachting sector, transforming Azimut into a bold and recognizable benchmark, and laying the foundation for the birth of the largest megayacht builder in the world, the Azimut | Benetti Group.

The international and management-based standing of the company today, is deeply nourished by the solid and memorable family heritage that has distinguished it from the beginning. A historically pioneering vision that enables it to continue thriving day after day, through ingenious inventions and long-term goals that look to the future with Paolo's daughter, Giovanna Vitelli.

# A SUSTAINABLE VISION TODAY, FOR TOMORROW

An avant-garde vision and a strong emotional appeal have shaped the history of Azimut as a leader in the field of nautical innovation as well as its commitment to the creation of a sustainable-oriented and attentive company culture today.

An ambitious and personal touch that has allowed Azimut to grow and evolve on both levels, embracing the challenge of a future nurtured by an eco-conscious approach to boat construction and by an authentic focus and responsibility on human well-being.

# OUR ♻️ ECO-YACHTING PHILOSOPHY

The Azimut I Benetti Group has made tangible investments to guide the Technical as well as the R&D departments toward the construction of yachts with a diminished environmental impact. Its main areas of intervention have focused on significantly lowering fuel consumption and CO2 emissions through the development of highly efficient hull designs, innovative propulsion systems and an extensive use of carbon fiber to decrease yacht weight.

# A SAFE AND HEALTHY WORK ENVIRONMENT

The forerunning shipyard of Avigliana was the first of the company's Italian shipyards to obtain the ISO 45001 certification in 2011, attesting its rigorous abidance to all occupational health and safety requirements. Recognized as the most technologically-advanced shipyard in Europe, it has also led the nautical sector revolution in terms of being among the earliest adopters of the vacuum infusion process to drive resin into a laminate, avoiding styrene emissions and therefore guaranteeing its precious workers a healthier setting.

As of 2013, all the other Italian production sites have adapted to meet the necessary requirements to obtain the ISO 45001 certification.

# THE LARGEST PRIVATE GROUP IN THE YACHTING WORLD

Azimut is part of the Azimut | Benetti Group, the biggest private player and shipbuilder in the nautical sector today. The Vitelli family, the founder and majority shareholder of the company, has been leading the way for over fifty years now, continuing to innovate through the Group's main yacht brands, Azimut and Benetti, while developing a variety of service brands to cater to the different demands of ship owners worldwide.
